Interior Design: Theory and Process uses a ground-breaking approach which brings vitality and clear communication to a misunderstood and often free-wheeling design discipline. It categorises design into nine key elements, including space, light, display and storage, and offers new terminology to describe each area. Drawing on more than 45 years' experience as an interior designer, Anthony Sully provides the ultimate resource in insight and explains best practice from interpreting a client's brief, to analysing the building, to setting up a design team and work schedule plus a host of other practical aspects. This toolkit also includes illustrations and explanations of how to analyse space and form in relation to human activity, the formulation of design concepts, and how to learn from past mistakes.

About the author

Anthony Sully is a graduate and Silver Medallist of the Royal College of Art. His career has been divided equally between practising as an interior designer and teaching at various universities in the UK and the USA. He runs his own interior design consultancy.
