

Built Environment Action Register: Reconstruction Technical Advisor, Pakistan

ARCHITECT / ENGINEER / SURVEYOR

ROLE

- Provide technical evaluation of a number of construction projects by a world-leading reconstruction NGO following the 2005 earthquake.
- Lead site visits, often to remote locations, to assess the progress and contract management of construction projects.
- Compile evaluation reports detailing strengths and weaknesses of project implementation, lessons learnt and recommendations for future actions.

REQUIREMENTS

- Qualified architect / structural engineer / surveyor with significant humanitarian experience (ideally post-earthquake assessment/reconstruction).
- Understanding of construction site programming.
- Inspection and reporting experience.
- Excellent site inspection ability and previous experience in a technical evaluation role.
- Ability to communicate technical information through both verbal and written mediums in English.
- Experience of working in Pakistan preferred.
- Knowledge of Urdu advantageous.

Article 25 is an NGO team of construction professionals designing built solutions in post-disaster and post-war locations throughout the world. Projects include:

- Post-earthquake school reconstruction, Haiti.
- Earthquake resistant housing construction, Pakistan.
- Conservation based masterplanning in the Gola Forest, Eastern Sierra Leone.
- Prototype Child Friendly School, Sierra Leone.

Information

- Start date: Late June, on site in Pakistan.
- Duration: 6 months.
- Salary: dependent on experience.

Contact

- Submit a CV, covering letter and examples of relevant work to Heather Stuart at Article 25.
- Email: recruitment@article-25.org

Deadline: Applications will be considered upon receipt with a view to appointing the successful candidate immediately.
